

Sinatra Notes

Introduction to MVC

Martinique Dolce | 20201229

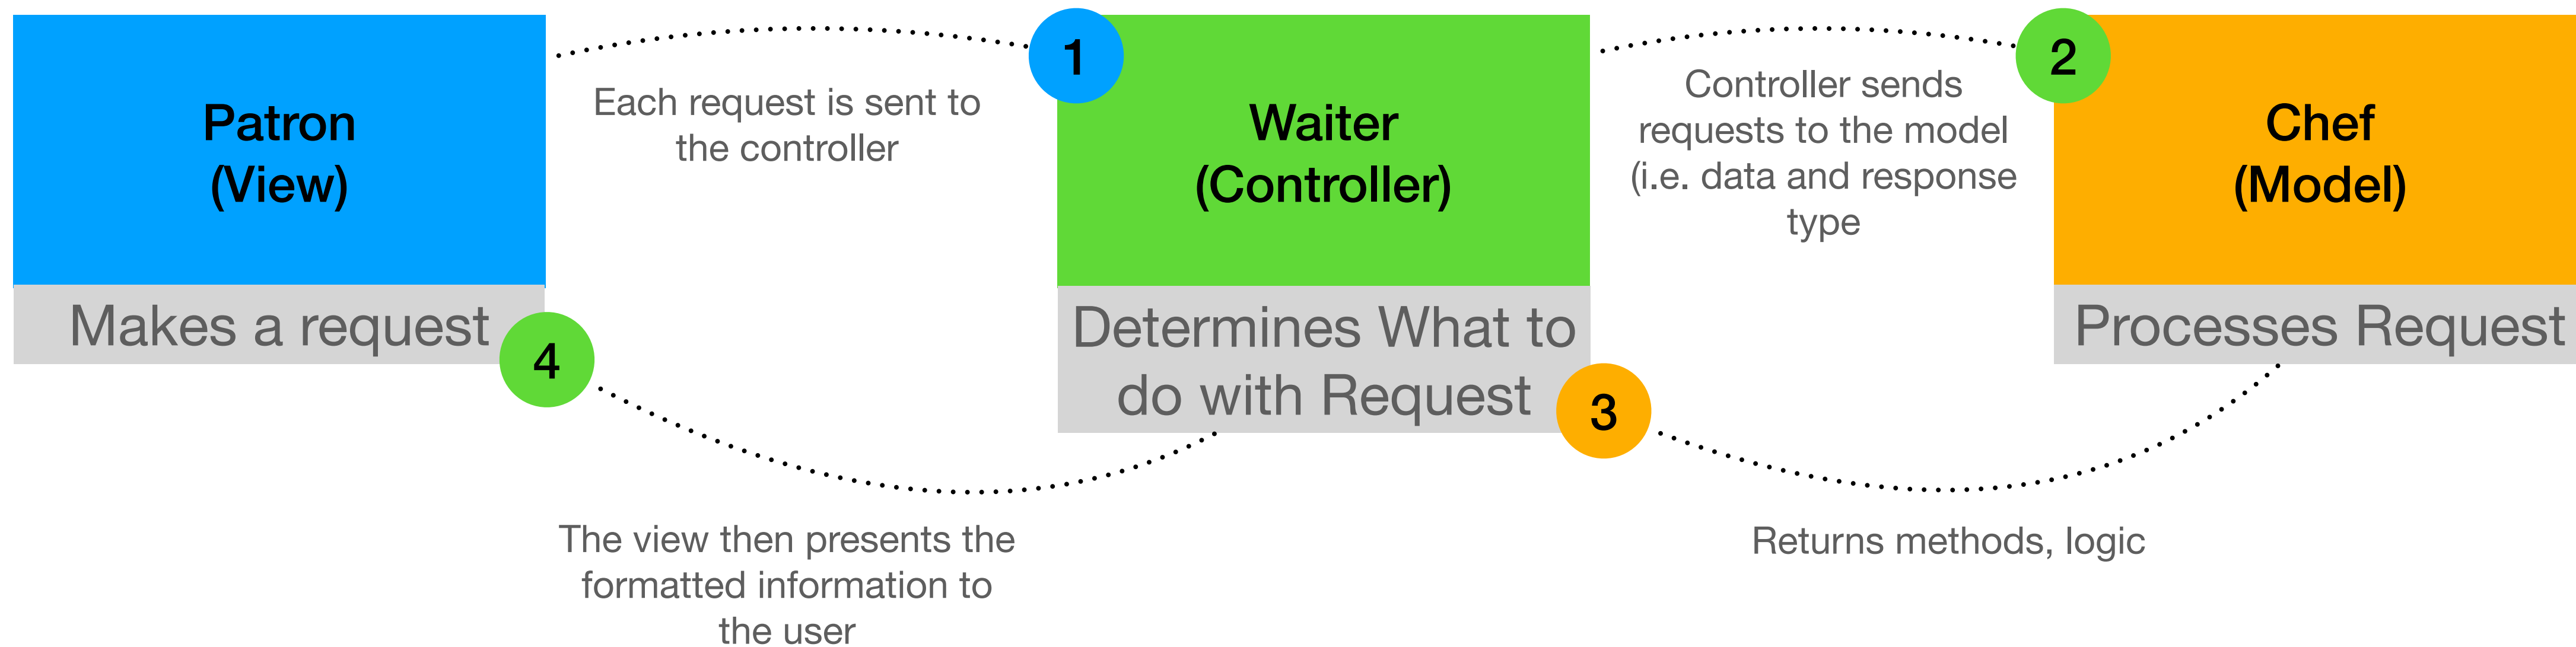

Define and describe the three components- models, views, and controllers- of the MVC framework

MVC

Define and describe the three components- models, views, and controllers- of the MVC framework

MODEL	VIEW	CONTROLLER
App Logic	Front End (UI)	In-between Models and Views
Manipulates data (database)	HTML/CSS/Forms/ERB - Templates	It decides what goes where
Returns Methods	Used to bring in info back from the models, through the controller back to the views	
	Dynamically generates websites	

MVC - Example Restaurant

MVC MVC - Example Restaurant => Ruby
